TECHNICAL SKILLS

- Programming language: C,C++,MySQL(basics).
- Knowledge of Data structures using C, OS,FLAT.

PROJECT WORKS

CG Project:"STEAM ENGINE"

Description: The project demonstrated the working of the steam engine which included the rotation of the piston along with the demonstration of speed which could be monitored

with respect to the users interest with the help of mouse and keyboard interface. The whole system could be viewed in different prospective in x, y and z axis. There were many other features that user could change like texture, transparency and the light(on or off).

IOT project:"Gas Detectors"(Home automation)

Description: It is used to detect any leakage of gas which might lead to disasters in case of ignorance. It works along with a web and android app interface using Raspberry Pi as server/gateway and ESP as a node for the devices. In case of any leakage and if that leakage is above the threshold level it is notified to the user by sending a message to their mobile and also by raising an alarm.

ACHIEVEMENTS AND EXTRA-CURRICULAR ACTIVITIES

- One of the event organizer for "Tech Debate" which was held as a part of CSI Region 5 Student Convention on March, 2017.
